Whiskey Creek Water Service Area – Water Supply Update

The Regional District of Nanaimo (RDN) has constructed a temporary over-land watermain to bring drinking water from a newly drilled well on Carson Road to the water storage reservoir on Poplar Way. The use of well water to replace the existing supply from Crocker Creek will bring a much-anticipated improvement to the volume and quality of water available to customers in the Whiskey Creek Water Service Area. The well water supply is expected to be fully in-place by November 30, 2021. The Crocker Creek water intake will be put on stand-by, and will eventually be decommissioned.

In 2022, the RDN plans to construct a permanent underground watermain along Carson Road. Funds for this project are currently being sought from federal and provincial funding sources.

Please visit rdn.bc.ca/whiskey-creek for more information about the Whiskey Creek Water Service Area, and please sign up to receive water system emergency alerts (for Whiskey Creek only) via email or text at vovent-alert.com/ca/community.
